

CLARIS FAMILY of AR

Technologically advanced anti-reflective coatings, *available exclusively from*
DIGITAL EYE LAB Network, a division of **ABB OPTICAL GROUP**

CLARIS^{HD}

Provides unsurpassed cleanability, scratch protection and durability. Specially formulated for today's high-tech digitally fabricated spectacle lenses, **CLARIS^{HD}** eliminates unwanted front and back lens surface reflections. **CLARIS^{HD}** provides outstanding contrast so that every detail looks crisper and sharper; ensuring clear, comfortable vision.

CLARIS^{HD} PLUS

A thermo-dipped hard coat providing industry leading scratch resistance and increased levels of hydrophobia, oleophobia and static resistance. While our premium AR coating virtually eliminates annoying reflections, **CLARIS^{HD} PLUS** also reduces eye fatigue and improves contrast and comfort. It provides maximum visual acuity by reducing glare, scratches and smudges. Lenses with **CLARIS^{HD} PLUS** are even easier to clean and keep clean.

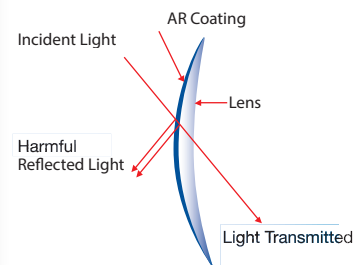

CLARIS bluDEFENSE

CLARIS bluDEFENSE reflects harmful blue light and UV light away from the eye while allowing beneficial blue light to pass through the lens. It protects the eyes from harmful HEV light by reducing backside reflection and also reduces scatter and glare for better vision and clarity. **CLARIS bluDEFENSE** improves comfort, reduces eye fatigue and headaches along with blurred vision associated with digital eye strain, all while maintaining lens transparency.
